

Bishop Square's Aluminum Can, Plastic and Glass Bottle Recycling

Bishop Square Management provides for the collection of aluminum can and plastic bottle recycling. The collection area is located in the recycling room in the basement area of the American Savings Bank Tower. There are designated bins specifically for aluminum cans and plastic bottles. It is the tenant's responsibility to collect and transport these items from their office to the designated aluminum can and plastic bottle recycling bins.

Our recycling vendor will empty the designated bins to be recycled on a regular basis.

Determine your collection area

You will need to determine an area within your office that you would like to target for your participants to leave their aluminum can and plastic bottle.

Choose a coordinator

It's always best to have one key person to coordinate your program. It keeps confusion to a minimum when there is one central point of contact.

Determine method of transport

Depending on the amount of aluminum cans and plastic bottles to be recycled, will determine the frequency and method of transporting the cans and bottles to the recycle room. Remember there is a freight elevator available that goes directly to the basement.
